**Subject:** BBA Support on defining leachate concentrations

Bob,

ICF has been tasked with defining the volumes and concentrations of several flows for the Bristol Bay Assessment, including flows related to waste rock leachate, water treatment plant failures, TSF releases, pipeline concentrate, etc.

Are you available to participate in discussions on this topic and to help ensure that our concentrations are reasonable?

Best regards,

Ralph

Ralph,

That's fine. I am on (b) (6) and will be out of town all of the following week at EPA's NARPM meeting. Otherwise, I am available.

Bob

Bob,

Are you available for a quick call this afternoon (say, 30 minutes) to discuss the overall objectives and approach? If so, what time works for you?

We'll probably need a longer call or calls on Monday or Tuesday to hash out details, but today's call can get us started.

Ralph
